

START

```
graph LR; START([START]) --> B1[ ]; B1 --> P1[ ]; P1 --> M1[ ]; M1 --> B2[ ]; B2 --> P2[ ]; P2 --> M2[ ]; M2 --> P3[ ]; P3 --> M3[ ]
```

The diagram is a flowchart illustrating a process flow. It begins with a yellow downward-pointing triangle labeled "START". A line from the triangle splits into two parallel paths. The top path consists of a light blue arrow pointing right, followed by a square node containing an envelope icon, which is also marked with a light blue downward-pointing triangle. This node then splits into two parallel sub-paths, each consisting of a light blue arrow pointing right followed by a square node with an envelope icon, also marked with a light blue downward-pointing triangle. The bottom path consists of a light blue arrow pointing right, followed by a square node with an envelope icon marked with a light blue downward-pointing triangle, and then another light blue arrow pointing right followed by a final square node with an envelope icon marked with a light blue downward-pointing triangle.
